In 2013, America’s farmers showed how, with resilience and resolve, they truly are heroes. Following a year of record drought and confronting a late, wet planting season, these strong, independent men and women worked tirelessly to plant a crop that would produce an unparalleled abundance. Their hard work and determination provide our nation with the corn that fuels our economy, feeds our people and drives innovation. Exhibiting both character and excellence, corn farmers provide the uniquely American crop that drives our country’s unequalled success. As you turn these pages, you too can take a journey that celebrates the World of Corn.
The World of Corn

U.S. Corn at a Glance
2013

95.4 Million Acres Planted
87.7 Million Acres Harvested
13.9 Billion Bushels Produced
$61.3 Billion Corn Crop Value
$4.40 Average Price/Bushel

Corn starch is preferred in many commercial food applications due to its translucent nature versus flour which is opaque.

Corn starch can be used to create polylactic acid polymers. These can be processed into sustainable versions of fibers and plastics.

Corn syrup is used as a sweetener, thickening agent and as a humectant, a water-absorbing ingredient helping food retain freshness.

Only the starch is used to make ethanol. The remaining nutrients, protein, fiber and oil, known as Dried Distillers Grains with Solubles are used as feed.

U.S. All Crop Acres Harvested
2012-2013
(1,000 acre)

fireworks  adhesives  soaps  dyes  fiberglass
Corn Consumption Ethanol

U.S. Ethanol Production Facilities
Ethanol is a powerful force in realizing a reduction in our dependence on crude oil. Thanks to ethanol, plant-based biofuel is the fastest-growing renewable energy technology.

The U.S. Department of Energy estimates for every one billion gallons of ethanol produced, 10,000 to 20,000 jobs are added to our domestic economy.

Every day we work hand in hand with farmers to continually improve our products and systems. This partnership has enabled farmers to produce more using fewer natural resources than ever before.

That’s improving agriculture. That’s improving lives. And that’s what Monsanto is all about.

Founded in 1957, the National Corn Growers Association represents more than 40,000 dues-paying corn farmers nationwide and the interests of more than 300,000 growers who contribute through corn checkoff programs in their states. NCGA and its 48 affiliated state associations and checkoff organizations work together to create and increase opportunities for their members and their industry.

CORN EACH AMERICAN CONSUMES ANNUALLY 25 lbs.

20 BUSHELS ACRE harvested in 1912

158.8 BUSHELS ACRE harvested in 2013
